

WHAT'S STOPPING US FROM SHIPPING GREAT PRODUCTS AND MONETIZING THEM?

We know how to build. But do we know how to sell?

Vibe coding is easy. Getting someone to pay takes resilience.

A LAUNCH WITHOUT FEEDBACK IS JUST A DEPLOYMENT.

ANALYTICS

PostHog · Firebase Analytics · Mixpanel · Plausible — visitors, activation, retention, paid conversion, churn.

SUPPORT

Discord · GitHub Discussions · email · a simple form. Talk to the people who already showed up.

DISTRIBUTION

X · LinkedIn · Reddit · Product Hunt · YouTube / Instagram demos · SEO for the long game.

QUALITY

Sentry · Firebase Crashlytics · user-reported issues. Nobody needs every tool. Pick a tiny set.

CAN YOU EARN YOUR FIRST ₹1,000?

$$5 \times ₹199 = ₹995$$

Illustrative gross revenue — before taxes and fees. Payment is evidence of willingness to pay, not product-market fit.

01

Identify one painful problem.

02

Build the smallest useful solution.

03

Add a landing page and pricing.

04

Set up an appropriate payment method.

05

Share it with potential users.

06

Measure activity and collect feedback.

07

Improve from real customer behavior.

SOLO OR TEAM? WE DON'T CARE.

Individuals and teams are both welcome.

Existing products and brand-new ideas.

Any suitable stack. Any policy-compliant payment provider.

RevenueCat is a collaborator on the event page — not a requirement.

A workable monetization model counts. Big revenue this week is not required.

ONE SHARED SHEET. ONE PLACE TO TRACK YOUR PROGRESS.

Shipaton KUG Chennai — submissions										Google Sheets
Product Name	Creator / Team	Category	Demo URL	Repo	Monetization	Payments	Deploy	Review Status	Prod Ready Thu	Notes
TinyInvoice	Solo	Micro-SaaS	example.com	Optional	₹199/month	Live	Production Ready	Review Ready	Yes	Tester feedback
QuizNight	Team Alpha	Mini Game	quiz.example	github.com/...	Paid levels	Test	Deployed	In Progress	No	Need onboarding
LogLens	Solo	Dev tool	—	Optional	Team seats	Planned	Building	In Progress	No	—

1. Fill the shared sheet.
2. Update progress and product URLs.
3. You set **Review Status** → **Review Ready**.
4. Organizers review only those rows.
5. Organizers record the outcome.
- Review Ready is your signal, not approval.**
- Sheet: SHEET_LINK_PLACEHOLDER

THURSDAY IS YOUR SHIPPING DEADLINE.

CHALLENGE WEEK

BUILD

Start new or improve what you already have.

ANYTIME

REVIEW READY

You ask organizers to look.

DEADLINE

THURSDAY

Deployed and production-ready for extra DevFest prize consideration.

AFTER

REVIEWED

Organizers score execution, not the checkbox.

Review Ready

You want organizers to review the product. Participant-controlled. Not the same as shipped.

- ▶ Working production URL or accessible release
- ▶ Usable onboarding
- ▶ Clear monetization approach
- ▶ Basic analytics or feedback collection

Production Ready by Thursday

Deployed, usable, and actually ready for users. Extra prize eligibility — not an automatic win.

- ▶ Core functionality works
- ▶ No critical blockers
- ▶ Payment flow functioning when applicable
- ▶ Enough information for organizers to test

SHIP IT. GET REVIEWED. WIN BIG.

Admit one · DevFest Chennai

SELECTED WINNERS GET DEVFEST TICKETS

Sat 17 Oct 2026 · IITM Research Park

Organizers review products. Selected winners receive DevFest Chennai tickets.

Prizes are also awarded at DevFest itself.

Thursday production-ready teams are considered for an additional prize — eligibility, not a guarantee.

We recognize execution, utility, quality, monetization thinking, and the ability to ship.

Usefulness

Execution

UX

Monetization potential

Real deployment

Learning

Don't just build another side project. Build something people can use, ship it to the world, and see if someone is willing to pay for it.
